1. Insert Main Wing Spreader through the Hole.

2. Insert Main Wing Spreader into T-Connector.

3. Insert Main Wing Spreader into Connectors. (Repeat Steps 1 & 2 for other side).

4. Insert Tail Wing Spreader through the Hole, slide all the way through & insert into Connectors (left/right).

5. Locate Vertical Tail Strut & insert end into Connector at the bottom.

6. At front, insert Vertical Strut into Top Connector.

7. Insert Propeller Spreader into Side Connector.

8. Remove Ring & put Propeller on. Put Ring back to secure Propeller.

Attach the QuikClip® to the Bridle Loop. Top Loop for Light to Medium Winds, Bottom Loop for Strong Wind. For Strong Wind conditions, tie SkyStreamers™ to the Loops (left/right).

## LAUNCHING - ASSISTED LAUNCH

- The kite requires a minimum wind of 7 mph/11.3 kph. Let out approximately 75 feet/22.9 m of line and have an assistant hold the kite.
- With your back to the wind, release the kite and take a few steps backwards, the kite will rise into the air. Tug line to gain altitude, let out line to gain distance.
- For storage, reverse assembly steps and place into tube. Store your kite in a cool dry place. Excessive heat and/or sunlight can damage the package and kite.

## KITE SAFETY

**WARNING!** Do not fly near overhead power lines.  
**WARNING!** Do not use near overhead power lines or during thunderstorms.  
**WARNING!** Not suitable for children under 3 years due to small parts.
