Pass Spreader over Struts and Insert into Pockets. **4**

Insert Strut into Pocket. **3**

Insert Strut into Pocket. **3**

Spine

Connect Upper and Lower Spine at Metal Connector. **1**

Unwind all SkyTails® Left and Right. **5**

Unwind all SkyTails® Left and Right. **5**

Push Spine up and Secure Pocket. **2**

Pull Bridle Lines tight before Launch. **6**

Attach the QuikClip® to the Bridle Loop (Front of Kite). **7**

Top Loop:  
Strong Wind

Bottom Loop:  
Light to Medium Wind

In stronger winds, tie SkyTails® together for more stability. **8**

Front of Kite

## LAUNCHING - ASSISTED LAUNCH

- The kite requires a minimum wind of 7 mph / 11.3 kph. Let out approximately 75 feet / 22.9 m of line and have an assistant hold the kite.
- With your back to the wind, release the kite and take a few steps backwards, the kite will rise into the air. Tug line to gain altitude, let out line to gain distance.
- For storage, reverse assembly steps and place into package. Store your kite in a cool dry place. Excessive heat and/or sunlight can damage the package and kite.

## KITE SAFETY

**WARNING!** Do not fly near overhead power lines.  
**WARNING!** Do not use near overhead power lines or during thunderstorms.
